EDUCATION

United Institute of Technology, Prayagraj	2024 – 2028
Bachelor of Technology (B.Tech) in Computer Science & Engineering	CGPA: 7.99
Ewing Christian Public School, Prayagraj • Class 12th (CBSE): 77.4% • Class 10th (CBSE): 80.6%	2022 / 2020

TECHNICAL SKILLS

Languages:	Java, Python, JavaScript (ES6+), SQL
Frontend:	React.js, Vite, CSS3, Responsive Design, State Management
Backend & Systems:	Node.js, Express.js, RESTful APIs, MVC Architecture
Databases & Cloud:	MongoDB, Firebase, MySQL
AI & Data Science:	Hugging Face Transformers (DeBERTa, DistilBERT), Pandas, NumPy, Scikit-Learn, PCA
Tools & Practices:	Git, GitHub, Vercel, Agentic AI Workflows, Architecture Diagramming (Mermaid.js)

WORK EXPERIENCE

PineEV (Intrisync Solutions Private Limited)	Sept 2026 – Present
Full Stack Developer Intern	Hybrid / Remote
- Collaborating on the core development of the PineEV electric-vehicle charging platform across full-stack features. - Implementing modular backend endpoints, responsive client-side views, and maintaining high codebase quality standards. - Participating in sprint planning, technical discussions, and adhering to agile workflow and version control practices.	

PROJECTS

PM GatiShakti • Land Acquisition Delay Intelligence Platform	[Live Demo] [GitHub]
<i>FastAPI, React + Vite, Tailwind CSS, Celery, PostGIS, Docker, Apache Airflow, Survival Analysis</i>	
- Architected a distributed microservices decision-support system predicting land acquisition corridor risk under NH Act 1956. - Implemented asynchronous spatial analysis using PostGIS and Celery worker queues, cutting geospatial query latency. - Constructed automated ETL ingestion pipelines via Airflow DAGs and deployed the responsive interface to Vercel.	
Hybrid Fake News Detection & Fact Verification System	[IBM Credential]
<i>Python, PyTorch, Hugging Face (DeBERTa-v3, DistilBERT), Scikit-Learn, Pandas • IBM Training</i>	
- Engineered a dual-model deep learning pipeline evaluated on the 72,000+ WELFake dataset, achieving 90%+ F1-score. - Fine-tuned DeBERTa with K-Fold cross-validation, outperforming baseline classical ML models (Logistic Regression, Naive Bayes). - Constructed an end-to-end tokenization and inference pipeline outputting real-time credibility confidence metrics.	
Clinical & Demographic Exploratory Data Analysis (EDA) Suite	[NASSCOM Certified]
<i>Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-Learn (PCA) • NASSCOM FutureSkills Prime</i>	
- Executed comprehensive data cleaning, missing-value imputation, and multi-variable distribution profiling on healthcare data. - Applied Principal Component Analysis (PCA) for dimensionality reduction, revealing dominant feature variance clusters. - Validated statistical and predictive insights aligned to industry competency standards (Silver Assessment Score: 68%).	
Real-Time Weather Forecasting & Climate Analytics Dashboard	[GitHub]
<i>JavaScript (ES6+), HTML5, CSS3/Tailwind, OpenWeatherMap API, Geolocation API</i>	
- Built an asynchronous single-page web app providing real-time meteorological forecasting and geo-coordinate search. - Implemented client-side debouncing on input events, curtailing redundant network calls by 40% and optimizing render performance.	

CERTIFICATIONS & ACHIEVEMENTS

Virtual Internship in Generative AI • IBM India Pvt Ltd / IBMCEP (IBMMooc)	Cert ID: PBELGEN321IN
Exploratory Data Analysis (EDA) • NASSCOM FutureSkills Prime (Silver Category)	Cert ID: FSP/2026/7/10332979
Competitive Programming & Problem Solving • Active coding across LeetCode & GeeksforGeeks in Java	100+ Solved
